

LAND SHARK®

Instant Survival Shelter & Stealth Bag

HOW IT WORKS

The Land Shark is an immediate and long-term shelter to help you stay dry, retain heat, and reduce the cooling effects of the wind. When cut into a sheet, it also offers excellent shade protection from the sun.

The Land Shark is a thermal protective aid for use on land or water, primarily designed to reduce the loss of vital body heat and risk of hypothermia.

The patented ultra-lightweight (22 oz.) emergency bag is constructed of a micro-thin layer of aluminized film laminated to a reversible, digital camo pattern outside and International Orange inside, composite reinforced ripstop material. The aluminized coating reflects up to 80% of the user's radiated body heat. The Land Shark is completely windproof, waterproof and acts as a vapor barrier. The tightly-woven reinforced ripstop add considerable strength and prevents tears, a frequent critical failure in common unreinforced thermal protective aids.

FOR USE ON LAND

The Land Shark provides a waterproof, one-person emergency shelter large enough to provide full body coverage, even over heavy outerwear. It's tough enough to withstand the rigors of a survival situation, yet light enough to be easily carried.

If available, use natural materials to enhance the insulating properties inherent in its design and construction. Slitting the side seams turns it into a versatile tarp or emergency shelter.

The large, bright orange surface makes an excellent emergency signal, easily visible from the air. In a desert environment, it provides vital shade and is especially effective at reflecting the sun's deadly rays.

Water, vapor and grease proof vacuum bag

Strong carrying case made from sturdy, waterproof, vinyl-coated, 600 denier polyester

Size: 8" x 7"

Hook and loop

Zipper

Belt loop with large VELCRO® attachment

SPECIFICATIONS

- Large enough to provide full body coverage over heavy outerwear.
- 38" x 80" with double sewn, waterproof seams.
- 550 paracord drawstring with cord lock and Sea-Dog® Clip.
- Ultra-lightweight at just 22 ounces.
- Reversible with digital camo pattern outside, and International Orange inside.
- Waterproof construction.

WATER SURVIVAL

The Land Shark completely encloses the survivor (with a life vest on), without impairing any other functions. With a rate of heat exchange 25 times greater in the water, the bag significantly slows the drain of vital body heat, while providing protection from chilling sea spray and breaking waves. This considerably extends survival times. The aluminized material is radar reflective for search aircraft and high-speed vessels moving at night. The bag can also be configured to provide ventilation and shade for exposed skin.

The waterproof construction of the Land Shark deters shark attacks by preventing body oils, waste and blood from entering open water. In addition, the voluminous bag alters the shape of the survivor and reduces flailing movements, presenting a less attractive appearance to marine predators. The Land Shark also provides complete protection from venomous jellyfish, Portuguese Man-Of-War and sea snakes. A Sea-Dog® Clip tether is included to ensure survivors stay together.

EVADE DETECTION

It can mean the difference between life and death

The ability to evade detection can mean the difference between life and death. The Stealth Bag is your personal emergency survival system that preserves body heat while reducing your IR signature to an undetectable level. The Stealth Bag's digital camo pattern blends into the background, significantly reducing your visible profile.

After testing, Soldier of Fortune Magazine concluded that:

"The new Stealth Bag is essential gear for those in a SERE scenario whose survival depends on their ability to hide not only from visual detection but [from] sophisticated infrared detectors as well"

When properly using the Stealth Bag, you can literally "hide in plain sight."
