## Land Shark Survival Shelter Gear review

Posted by Claire Walters on Aug 18, 2013 in Featured, Gear Reviews, Shelter / Tarps, Trail Gear Gallery | 0 comments

**WHAT IS A LAND SHARK?** An Instant survival shelter and a good tool for a bad day. Land Shark is designed to save your life from hostile elements on land or in water. Its patented design keeps you warm, dry, and visible to search & rescue crews for miles. When traveling into the unknown, always bring your Land Shark.

Just recently Smokeeater908 was seen talking about the Land-Shark survival blanket on his youTube channel.

Below is wording from the manufacturers site – [Land-Shark.com](#)

The Land Shark is constructed of a micro-thin layer of aluminized film laminated to a resilient, composite reinforced, ripstop material. The aluminized coating reflects up to 80% of radiated body heat. The tightly-woven ripstop reinforcing seam construction resists tears and punctures, even from boots and sticks. The Land Shark is completely windproof, waterproof and acts as a vapor barrier.

### How it works?

#### 1 Heat Retention

A micro-thin layer of aluminized film reflects up to 80% of radiated body heat – highly effective in combating hypothermia on land or in the water with a life vest on.

#### 2 Vapor Barrier

Land Shark is completely windproof and waterproof. This barrier prevents body oils, waste and blood from exiting the bag when used in water.

#### 3 Military-Grade Construction

Tightly woven, ripstop reinforced waterproof seams reduce punctures or tears during use.

#### 4 Eyelets

Eyelets help attach the 550 paracord when making a shelter out of Land Shark.

#### 5 International Orange

Land Shark's eye-catching color is visible to search & rescue teams from miles away. In water, it provides more than 20 times the visibility of a person in just a life vest.

### 6 An Instant Shelter

Simply cut a Land Shark along the seams and prop up its sides to create an incredibly visible, waterproof shelter, which also protects from the sun's rays.

## Features

### Reversible – Orange/Camo

The International Orange color makes an excellent emergency signal, readily visible to search & rescue teams from great distances. Digital Camo provides visual masking for avoiding detection.

### Composite Reinforced, Ripstop Material

Strengthens Land Shark reducing punctures and tears, even while user is wearing heavy boots.

### Aluminized Film

Combats hypothermia and eliminates infrared emissions for stealth and evasion from high-tech, body heat detection equipment. The aluminized material is also radar reflective for search aircraft, search & rescue teams and high speed vessels moving at night over water.

### 550 Paracord Drawstring

Used to create a hood or to close the shelter entirely for maximum protection and body heat retention. In the water, the closed bag helps prevent water ingestion in heavy seas.

### Sea-Dog® Clip and Survival Whistle

Integral tether easily links multiple survivors together during a survival situation at sea. Creates a larger target for search & rescue teams to locate on open water, as well as a whistle to attract attention from great distances.

## Order online: Go to [Land-Shark.com](http://Land-Shark.com) for more details or to place an order

### The Land-shark includes

- Water, Vapor and Grease-Proof Vacuum Bag
- Instructions Provided
- Sturdy Carry and Storage Pouch 8.5 x 7.6 inches (21.6 X 19.3 cm)
- Belt Loop and Velcro Attachment
- Hook and Loop
